County: \_\_\_\_\_ Current Zoning: \_\_\_\_\_

**SOIL BORING REQUIREMENTS**

Accurately complete this soil boring application and provide a check or money order for \$300.00 payable to McHenry-Lake County SWCD for borings in McHenry County and \$350 for borings in Lake County. (The Lake County Board of Health Septic Ordinance requires more borings and additional information compared with the Public Health Ordinance for McHenry County).

Provide MLCSWCD with a sketch delineating the lot and precisely indicating where the proposed house and the proposed septic absorption field will be located. Be sure to indicate the direction north and any restricted areas. Examples of restricted areas include: easements, septic restricted areas, well setback zones, and other state and county restrictions.

This soil boring only indicates soil characteristics present in the area tested. If the intended location of the system changes, another boring will likely be required. Any changes to the area tested, such as cutting, filling, or excessive trafficking may void the results of a boring, and new boring may be required. Results of this boring cannot be officially interpreted by the McHenry-Lake County SWCD for septic suitability or buildability.

The applicant is solely responsible for siting the septic location in compliance with county ordinance and obtaining permission for our access to the property.

If the applicant for any reason decides to cancel the application before the soil boring is performed, a \$30.00 processing fee will be charged.
